

# KILGORE POND

Bowtown and Pierce Pond Twps., Somerset County  
U.S.G.S. Pierce Pond, Maine (7½')

## Fishes

Brook trout  
Chain pickerel

Minnows  
Finescale dace

## Physical Characteristics

Area - 96 acres

Maximum depth - 34 feet

Principal fishery: Brook trout

Temperatures:

Surface - 70°F

33 feet - 41°F

Kilgore Pond is located between Pierce Pond and the Dead River. A small inlet enters the southern tip of the pond from King Pond. Its outlet flows west into nearby Grass Pond. The pond's shoreline is undeveloped.

Water quality in Kilgore Pond is good for coldwater gamefish. Brook trout are stocked to provide a fishery because the pond lacks the sufficient spawning habitat for a sustainable native population. Trout growth is excellent with only light competition from chain pickerel.

Kilgore Pond is accessible via 4-wheel drive roads leaving the Long Falls Dam Road. The pond is open to fly fishing only in the summer and closed to fishing in the winter. See the lawbook for additional regulations.

Surveyed - August, 1960

Resurveyed - 1974, 1989
